Manual Statements

2014. Thank you for selecting our mobile phone. This user guide will provide you with the general information and operation instructions.

Note:

- Use only accessories approved by the phone manufacturer to ensure safety. Failing to comply with this will violate the terms and conditions of the warranty.
- If the contents and displays described in this user guide do not match the actual operation of the phone set, please use the display of the actual phone set.

We reserved the rights to change the mechanisms of the phone without notice.

Protect your environment! We strive to produce products in compliance with global environmental standards. Please consult your local authorities for proper disposal.

General Information

1. Security

✧ Emergency call

In any country, you can dial 112 (or other emergency call number) for emergency help.

Note: Based on the nature of cellular networking, the success of the emergency call cannot be guaranteed.

✧ Safety Precautions

Before using your phone, please read the following important information to eliminate or reduce any possibility causing damage and personal injury.

- Do not use wireless phones while driving.
- Switch off wireless devices in aircraft.
- Do not use mobile phones at refueling point. Don't use near fuel or chemicals.

Follow regulations or rules in hospital and health care facilities. Switch phone off.

- Only qualified service personnel can install or repair this device.
- Use only approved accessories and batteries.
- Do not expose your phone to extreme high temperatures above +60°C (+140 F).

✧ Battery Information

Information Charging and Discharging

- The charger is designed to be used in temperatures between 0 to 40°C.
- Do not charge the phone in wet and damp conditions.
- We strive to produce products in compliance with global environmental standards.
- When a charger is not in use, disconnect it from the power source. Do not leave the battery connected a charger for longer than 12 hours, since overcharging may shorten its life.

Tips for Battery

- Do not disassemble or modify the battery by yourself.
- Do not short-circuit the battery.
- Do not dispose of batteries in fire.
- If you smell anything strange from the battery or find that the battery is overheated, you should stop using it immediately and contact the authorized Service Center in your region.

2. Getting Started

2.1.1. Installing and uninstalling SIM card

Switch off the phone; remove the back cover, battery and other external power source. Fit the SIM card into the SIM card slot.

2.1.2. Charging the battery

Plug the charger into the socket on the side of your phone. Connect the charger to an AC wall socket. The blinking of the battery level icon indicates the battery is being charged. When the blinking stops, it indicates the charging is finished

During charging, the phone and charger will feel warm to the touch. This is normal.

Warning:

- The operating ambient temperature of the charger is 0°C-50°C. Do not use it when the temperature exceeds this limit.
- Use only chargers approved by the phone manufacturer to ensure safety. Failing to comply with this will violate the terms and conditions of the warranty.

2.2. Connecting to the Network

2.2.1. SIM card

Please insert available Subscriber Identity Module (SIM) card into your phone before using it. SIM card is supplied by your network carrier. All the information related to network connection is recorded on the SIM card, so are the contact information such as names, phone numbers and SMS that you set to store on the SIM. You can take out the SIM card from the phone and insert it into another GSM phone to use it. Most new phones will recognize the SIM card automatically.

2.2.2. Connecting to the network

After the SIM card is unlocked, your phone will automatically search for the registered network or other local available network. Once connected, the name of the network carrier will appear on the top of the screen.

Your phone is now in Standby mode, ready for making and receiving call

Main menu

3. Call logs

With this function, you can view the information of Missed calls, Dialed calls, Received calls, Rejected calls, Call timers, GPRS counter, and also you can clean all these records via Delete All menu.

4. Contacts

You can save a phone number in the memories of SIM cards or phone. Select a contact in the contact list window and press **LSK** to perform:

- **New:** Create a new contact inside phonebook. (You can use the left or right direction key to select(cancel) groups)
- **View contact:** View the current number details.
- **Write Message:** Directly input the SMS and send it to the searched phone number.
- **Call:** Call the current contact.
- **Delete:** Delete the current contact.
- **Delete multiple:** Delete all the marked contacts in one time.
- **Import/Export:** Export the contacts from SIM card & phone memory / Import the backup from memory card.
- **Send vCard:** Send a vCard via MMS or Bluetooth.
- **Add to blacklist:** Add current number into black list
- **Others:** You can check the Memory status.

5. Internet

Internet browser .All the functions of this menu will work only if GPRS is activated on your SIM card.

Note: Some pages need to enter some information in order to enter the next one page, press number 5 key to enter the Input interface.

6. Multimedia

6.1. Camera

With this function, you can snap. Press **Up direction Key** to snap under the view-finding window. Enter Camera Option, Your options include:

- **Capture:** Photograph.
- **Image viewer:** Enter in the album folder.
- **More options:** You can modify the **DC/DV mode, Effect, Contrast, Brightness, White Balance** and **others**.
- **Settings:** You can select different **Size, Quality, Banding** and **others**.

6.2. DV

- **More options:** please read the **Camera's** options for more information.
- **Camcorder Settings:** Set up the video recorder.

6.3. Image

You can view the photos snapped with the camera through this function.

6.4. Audio Player

You can enjoy the music with this function. You can use the following keys during the play.

Key	Function
Left direction Key	Press to switch to a previous song with cursor. Press and hold: go backwards
Right direction Key	Press to switch to a next song with cursor. Press and hold: go forwards
Up , Down key	Press to play/pause the Audio.
# / * key	Press to volume up and down.

Note: When you want to browse the music list, you may need to use the **Left / Right direction key** to enter the list interface.

6.5. Video

You can play the video with this function. You can use the following keys during the play.

Key	Function
Left key	Press to go backwards. Press and hold to continuously go backwards.
Right key	Press to go forwards. Press and hold to continuously go forwards.
Up, Down key	Press to play/pause the video.
# / * key	Press to volume up or down.

6.6. FM radio

You can listen the FM radio with this phone, also you can record the FM radio station which do you want record.

- **Pause/Play:** Press to play/pause the FM radio.
- **Auto search and save:** Search and save the channels.
- **Channel List:** Play, edit or delete the saved channels.
- **Save:** Save current playing frequency into channel list.
- **Manual search:** Search the radio by manual.
- **Open speaker:** Playing FM in loudspeaker mode. (It active when headset inserted only)
- **Background play:** Return the standby interface and keep paying FM radio.
- **Record:** Record the currently-hearing FM.
- **Record file List:** View the recorded files list.
- **Help:** You can get the operation guide in here.

6.7. Sound Recorder

You can take a recorder in this function. After record, access Options:

- **Start recording:** Select this option to record the sound.
- **Record file List:** View the currently-selected sound files.
- **Storage:** Change the file path for sound record file.
- **File format:** You can choose the format for record file. .AMR, or WAV

7. Message

You can send and receive the SMS or MMS as well as use Cell Location Display with this function.

7.1. Write message

Insert contents like pictures, melody, phone number and so on.

- **Send:** Insert the number of the contacts and then send SMS / MMS to this number.

7.2. Inbox / Outbox/ Drafts/Sent box

This function is used to check messages in Inbox/ Outbox/ Drafts and Sent box.

7.3. Security inbox

You can create a security message inside this folder, user to open it, must need the password, the default password is "1234"

7.4. Templates: Some message templates given inside this menu.

7.5. Broadcast Messages: Look up the broadcast messages.

7.6. Voice mail service: This is similar to the Answer machine. You may transfer the incoming call that you fail to answer duly to your Voice mail server, where the caller can leave message.

7.7. Settings: You can modify the default SMS Settings, MMS settings and push message.

7.8. Message capacity: You can check the Message capacity.

8. Application

8.1. Alarm

You can set up that the alarm clock will ring at a specific time with this function.

8.2. Electric Torch

Turn on or turn off the torch here.

8.3. Calendar

The screen will highlight the date of today after displays the monthly calendar when you enter in the calendar function.

- **Add new schedule:** Select Menu →Add new schedule→Write the schedule details →Select Store.

Note: When you want to add new **schedule**, you may need to use the **Left / Right direction key** to enter the ringtone interface and change the Type.

8.4. Calculator

Press **Option and then press = Key** to view the calculation results. Press the up, down, left, right key to select +, -, *, / respectively. Press Clear to delete the figure.

8.5. World clock

You can view the current local time of various countries.

8.6. STK

SIM Card support is required in this service.

8.7. Bluetooth

- **Bluetooth:** Open or close the Bluetooth
- **Bluetooth visibility:** Open or close the visibility.
- **Paired device:** Show the device which is connected
- **Device name:** Show off the name of Bluetooth.
- **Bluetooth file Storage:** You can select Storage memory card.
- **Help:** You can read some help information from it.

9. Fun & Game

- **Snake:** Game of snake. For more information please read the game helps.
- **Face book / Yahoo / Google / Ebuddy / Twitter / Friendster / MSM:** Some web link.

10. My Files

The File Manager lists the all the files stored in your memory card.

11. Settings

11.1. call settings

- **Dual SIM:** You can set your phone network status, including Standby mode, Reply by original SIM, Set SIM name.
- **Call divert:** Divert an incoming call to a designated phone number under the presetting condition. This function can be launched or closed.
- **Call waiting:** The network will inform you for a newly incoming call during the call. Please contact with your network operator to launch or close the function because the function requires the network support.
- **Call barring:** Set up the right of calling and answering. This function requires the network support. You can launch or close the function.
- **Hide ID:** Default status is Display ID by network.
- **Others:** The settings item include Call time minute reminder, Auto redial, Reply SMS after reject and Auto call record.

12. Appendix

The phone cannot be turned on: When the battery is very low, the phone may not be turned on properly. Please charge the battery.

My call is picked up by another phone: Check if call divert is set. If it is set, your incoming calls may be diverted to other numbers or devices.

No service

If you are in an area not covered by your network, or if a physical obstacle is present, such as in an enclosed area, the message "No service" will be displayed on your Standby screen and you will not be able to make or receive calls. You can try move closer to a window for better reception.

For emergency only: When you are outside your network but inside other network, you can only make emergency call.

No Valid SIM card: Your SIM card is locked or it has an error. Please insert the right SIM card or contact your service provider.

Enter PUK code: After three consecutive incorrect PIN code entries, the code is blocked, and you need the PUK code to unblock it. Contact your service provider.

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Certification Information (SAR)

This device meets guidelines for exposure to radio waves. Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves. These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being operated can be well below the value.

This is because the device is designed to use the minimum power required to reach the network.

The SAR limit adopted by USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the FCC and IC for this device type when tested for use at the Body is 0.669 W/kg, and when properly worn on the body is 0.971 W/kg. The SAR limit also adopted by Europe is 2.0 W/kg averaged over 10 grams of tissue. The highest SAR value for this device type when tested at the ear is 0.748 W/kg, and when properly worn on the body is 1.330 W/kg.
